

Industrial Safety

Safety is more than the
condition of being protected
against failure, damage, error,
accidents, or harm.
Safety is a way of life.

AIDT offers you the chance to see what OSHA might see if they visit your facility. And with AIDT's help, you can correct any problems before OSHA arrives and avoid costly fines — and more importantly, ensure the safety of your employees.

Our industrial safety assessments include opening and closing conferences with management, full facility walkthroughs, records review, employee interviews, and a detailed written report of findings and recommendations referenced to the applicable OSHA standard. We provide all the information and resources you need to meet OSHA training requirements.

More than that, we provide all the training and connect you with other resources needed to correct any safety hazards at your facility —before it's too late.

 **AIDT provides the insight and skills your company needs to be safe.**

OSHA Standards Training

AIDT staff are authorized by the U.S. Department of Labor's OSHA Training Institute to conduct comprehensive programs through the OSHA Outreach Training Program. AIDT offers 10 and 30-hour courses in construction and general industry safety and health standards. Your employees receive OSHA-issued cards following completion of each program.

Topics covered include, but are not limited to:

Construction Industry

- Introduction to OSHA
- Fall Protection
- Electrical Safety – construction
- Cranes
- Tools – hand and power
- Scaffolds
- Excavations
- Materials Handling, Storage, Use, and Disposal
- Personal Protective Equipment
- Stairways and Ladders

General Industry

- Introduction to OSHA
- Electrical Safety
- Flammable and Combustible Liquids
- Hazard Communication
